EXTRA PROTECTION FOR PAYMENT AND SECURITY TECHNOLOGY WITH A2P SMS

1 Enable 2 factor authentication

Build in the ability for clients to alert first-responders to system and network outages and automatically escalate incidents to back up responders.

2 Server/computer breach alerts

Help clients track ticket life-cycle and escalation and receive system health notifications and customer feedback via SMS.

Allow clients to send users password change reminders and reset notifications as well as log-in notifications and other miscellaneous alerts.

3 Track events and help manage resources

Help clients track ticket life-cycle and escalation and receive system health notifications and customer feedback via SMS.

Allow clients to send users password change reminders and reset notifications as well as log-in notifications and other miscellaneous alerts.

4 Fraud detection

Enable clients to quickly and reliably reach customers via SMS to verify suspicious activity on their account. Your clients can now avoid unnecessary interruptions in their customers' account activities by sending a quick text when a suspicious activity occurs, which can increase customer satisfaction and cut costs simultaneously.

5 Account management and alerts

Enable customers to allow users a quick and easy way to send and receive funds (or notification of funds), account balance alerts, scheduled alerts (daily, weekly or monthly balance alerts for example), credit status changes, and bill presentment or bill due date alerts all via SMS.

ABOUT MBLOX

Mblox is the largest Application to Person (A2P) mobile messaging provider in the world, trusted by more companies to carry their mission-critical traffic than any other service. As the industry's most experienced Tier One SMS aggregator, we provide reliable, uncompromising connections and create positive brand experiences that transform numbers into profitable relationships.
